

VICKY JADHAV

Senior Full-Stack Developer / Technical Lead

React.js | Node.js | AWS | TypeScript

Pune, Maharashtra, India | jadhavvicky124@gmail.com | +91 8600747531

LinkedIn: linkedin.com/in/vicky-jadhav | GitHub: github.com/jadhav-vicky

PROFESSIONAL SUMMARY

Senior Full-Stack Developer / Technical Lead with 9+ years of experience architecting, building, and scaling enterprise web and mobile applications using React.js, Node.js, TypeScript, GraphQL, and AWS. Leading offshore engineering teams of passionate developers through the full software development lifecycle, delivering serverless and microservices platforms for global enterprise clients. AWS Certified Solutions Architect - Professional with deep expertise in API design, cloud architecture, performance optimization, and CI/CD automation. Early adopter of AI-assisted development tools.

CORE TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Vue.js, Angular, Styled Components, Micro Frontends, Responsive Web Design

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, Apollo, Microservices Architecture, Serverless Architecture, JWT Authentication, API Design & Performance Optimization

Cloud & Infrastructure (AWS): Lambda, API Gateway, S3, DynamoDB, RDS, Cognito, ECS, EKS, SQS, SNS, Step Functions, CloudWatch, KMS, IAM, CloudFormation, AWS CDK, Terraform, Auto Scaling

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Firebase

DevOps & Tooling: GitHub, Bitbucket, CI/CD Pipelines, JFrog Artifactory, Turborepo, Monorepo, JIRA, Docker, Kubernetes

Testing & QA: Jest, Jasmine, Mocha, Chai, Unit Testing, Integration Testing, Test-Driven Development

AI-Assisted Development: Copilot, Cursor, Claude, AI-accelerated development, code review & refactoring

Leadership & Methodology: Technical Leadership, Team Mentoring, Architecture Ownership, Agile/Scrum, Client & Stakeholder Management, Code Review Standards, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Synechron Technologies Pvt. Ltd. - Pune

Apr 2022 - Present

Senior Associate / Technical Lead

Project: PRISM - Service Job Lifecycle Platform

Client: Asurion | Role: Technical Lead | Team Size: 8 | Jan 2023 - Present

Stack: Node.js, TypeScript, React.js, GraphQL, AWS Lambda, PostgreSQL, Turborepo, PNPM, JFrog, CI/CD

- Spearheaded offshore architecture, development, and deployment of an enterprise platform managing the complete repair/replacement job lifecycle for mobility devices at scale, serving as the primary technical owner across the delivery pipeline.
- Architected end-to-end AWS infrastructure (Lambda, API Gateway, PostgreSQL, Cognito) and defined the CI/CD pipeline strategy, enabling reliable, repeatable deployments across environments.
- Designed shared component and library packages within a Turborepo, monorepo adopted by 3+ engineering teams, eliminating approximately 40% of duplicated code and standardizing development patterns org-wide.
- Built and optimized GraphQL/Node.js APIs handling 1M+ requests/day with p95 latency under 200ms, powering job creation, kitting, technician assignment, delivery, repair, and inventory modules.
- Drove team-wide adoption of Copilot, Claude, and Cursor's AI capabilities to streamline the engineering workflow - automating unit test generation, accelerating code review turnaround with AI-assisted diff analysis, and generating/maintaining technical documentation - reducing manual review effort by an estimated 20-25% and improving test coverage consistency across modules.
- Defined coding standards, PR review processes, and release cadence, mentored 5+ junior engineers across the full delivery lifecycle.

Project: FSL - Kitting & Parts Management

Client: Asurion | Role: Senior Developer | Team Size: 3 | Apr 2022 - Dec 2022

Stack: React.js, TypeScript, Styled Components, Node.js, AWS Lambda, MySQL

- Architected the React.js frontend for a kitting workflow used by multiple enterprise clients to manage appliances and parts, improving page load performance by approximately 35% through optimized rendering and state management.
- Built and deployed serverless APIs on AWS Lambda powering UI features and leadership dashboards used by 15+ stakeholders, cutting report generation time from minutes to seconds and enabling near-real-time decision-making.
- Delivered end-to-end parts kitting, returns processing, technician part tracking, and real-time stock monitoring features, reducing manual reconciliation effort by approximately 50% and improving inventory accuracy across the fulfillment pipeline.

Cybage Software Pvt. Ltd. - Pune

Jun 2020 - Mar 2022

Software Developer

Project: TaxAct Assisted Technology

Client: TaxAct | Stack: React.js | Team Size: 6 | Jun 2021 - Mar 2022

- Developed a booking module for expert-assisted US tax filing, including real-time staff availability checks and call scheduling, supporting thousands of seasonal filers during peak tax season.
- Built responsive UI components and integrated REST APIs, writing comprehensive unit tests with Jest and maintaining 90%+ code coverage to ensure reliability during high-traffic filing periods.

MJB Technology Solutions - Hinjewadi, Pune

Jan 2019 - May 2020

Associate Software Developer

Project: Experience America - Educational Tourism Platform

Client: Experience America US | Stack: React.js, React Native | Team Size: 10 | Apr 2019 - May 2020

- Built a React web app and React Native hybrid mobile apps to manage tours, events, geofences, and multi-role user assignments; led direct client interaction and Scrum planning as the primary technical point of contact.
- Implemented background location tracking and geofencing (Ionic Cordova) alongside group chat with location and document sharing across 3 user types (students, staff, homestay hosts), enabling real-time coordination during international trips.

Project: Monga StrayField - IoT Monitoring Dashboard

Client: Experience America US | Stack: Angular | Team Size: 4 | Jan 2019 - Mar 2019

- Built a real-time Angular dashboard visualizing machine parameters with push notifications and alerting, giving operators immediate visibility into equipment status.
- Developed REST APIs for web-to-cloud communication, enabling reliable data sync between field devices and the monitoring dashboard.

WebWorx India - Pune

Feb 2017 - Dec 2018

Web Developer

- Developed responsive web UI screens with Node, Angular, and JavaScript (ES6), integrating RESTful backend services for client web applications.
- Built reusable UI components and collaborated with designers to deliver pixel-perfect, cross-browser interfaces, improving page consistency across 5+ modules.

CERTIFICATIONS

- AWS Certified Solutions Architect - Professional, Amazon Web Services
- Claude Certified Architect - Foundations

EDUCATION

Master of Computer Applications (MCA)

2017 - First Class

Modern College of Arts, Science and Commerce, Shivajinagar, Pune | Savitribai Phule Pune University (SPPU)

Bachelor of Computer Science (BCS)

2014 - First Class

New Arts, Commerce and Science College, Parner, Ahilyanagar | Savitribai Phule Pune University (SPPU)
